

Listing of the claims:

1. (Currently Amended) Method for coating, in particular for painting, objects, especially vehicle bodies, comprising a plurality of parts which are initially separate and can subsequently be connected to one another, in which method the objects are guided on skids with the aid of a conveying system through at least one coating station, in which at least one application device is arranged, characterised in that at least one part ~~(8)~~ of the objects is guided through the coating booth ~~(8)~~ on its own skid ~~(2')~~ separately from the other parts ~~(5, 6, 7)~~.

2. (Currently Amended) Method according to claim 1, characterised in that the skid ~~(2')~~ on which the at least one part ~~(8)~~ is carried follows the skid or skids ~~(2)~~ which carries or carry the other parts ~~(5, 6, 7)~~ of the objects, through the same coating booth ~~(8)~~.

3. (Original) Method according to claim 1, characterised in that the at least one part of the object is led on its own skid through a different coating booth to the other parts of the object, the application devices in both coating booths being fed from a common paint supply means.
